Selected Case Studies Report

Student Name	N. Guna Varishini
Roll Number	26001414
Branch / Section	CSD-1 (sec-1)
Course	Web Development
Academic Year	2026–2027

Submitted as part of the Web Development Activity-Based Learning task.

Selected case studies: 14, 15 and 5

1. Introduction

This report documents three selected website interface case studies from the Web Development Activity-Based Learning circular. The work demonstrates responsive page sections, navigation, cards, structured content and interface elements using HTML and CSS, with a small JavaScript filter in the digital library interface.

2. Case Study 14 – Healthy Food and Nutrition Website

Project name: FreshBite

The circular asks for nutritious recipes, meal plans, ingredient lists, calorie information, healthy eating tips and food categories presented through responsive cards and recipe layouts.

Implemented sections shown in the supplied output: hero banner and navigation; food categories; popular healthy recipes with preparation time and calorie values; fresh ingredient groups; daily meal plan; and healthy eating tips.

3. Case Study 15 – Yoga and Meditation Website

Project name: ZenLife

The circular asks for yoga poses, meditation techniques, instructor profiles, class schedules, membership plans and wellness articles, using calming colors, readable typography and responsive image sections.

Implemented sections shown in the supplied output: hero banner and navigation; yoga pose cards; meditation technique cards; and an instructors section heading. The supplied screenshots do not show the full schedule, membership or article content.

4. Case Study 5 – Digital Library Management Interface

Project name: BookNest

The circular asks for book categories, book covers, author details, availability labels, search and filter interface elements, and library rules. It also recommends CSS Grid and structured tables for catalogue information.

Implemented sections shown in the supplied output: hero banner; library statistics; book categories; popular book cards with cover designs, author names and availability status; and a search/category filter interface.

5. Technologies and Implementation

HTML5 is used to structure page content and navigation. CSS is used for colors, typography, spacing, cards, grid layouts and responsive behavior. JavaScript is used in BookNest to filter displayed books by title/author text and category. The project source files are included in the companion ZIP archive.

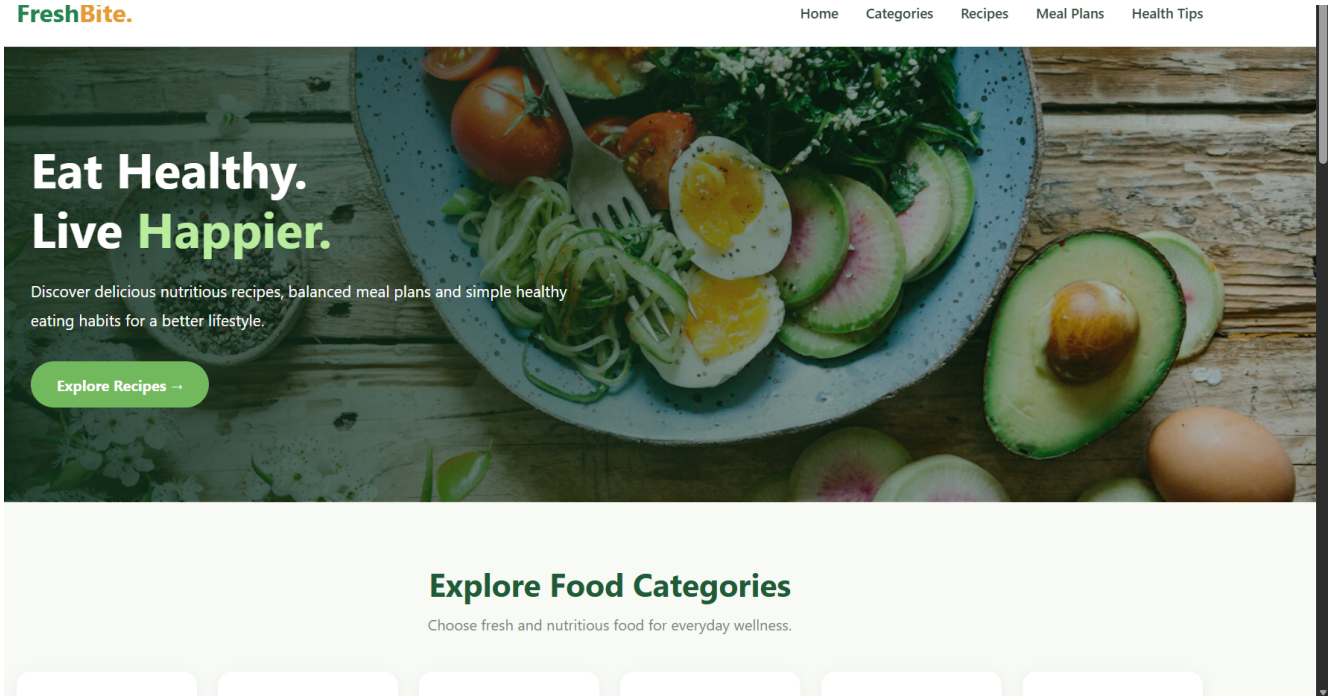

6. Conclusion

The three selected case studies demonstrate different website layouts: a nutrition information site, a wellness site and a digital library interface. The screenshots in the following pages are the output evidence supplied for this report.

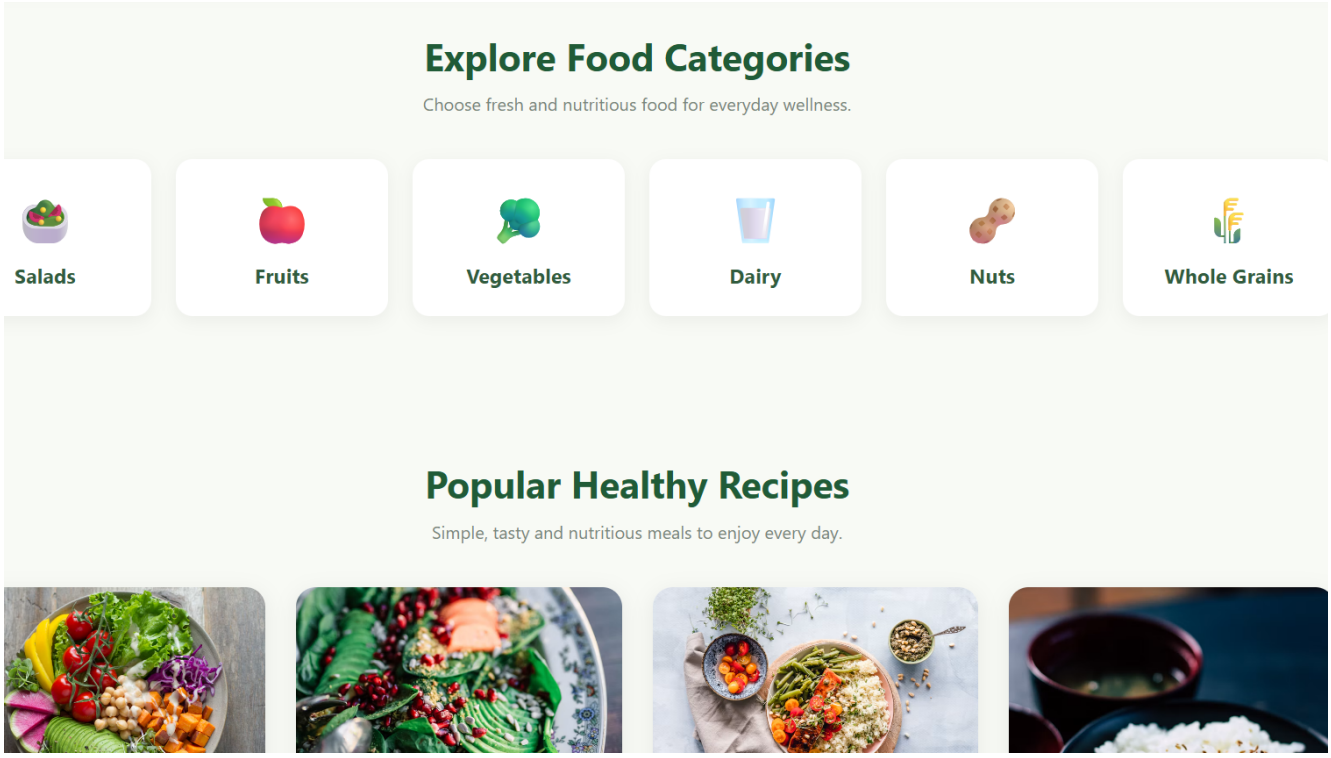

7. Screenshot Evidence

Screenshots are grouped according to their visible website identity: FreshBite (Case 14), ZenLife (Case 15) and BookNest (Case 5).
